

Gramm Barrier Systems

Gramm Barrier Systems ArmaGATECANTILEVER / SLIDING® systems offer a wide variety of heights and widths clad with various materials. Each Gate is made up of the highest quality materials which are then clad with our ArmaMesh®, ArmaBar®, ArmaPALISADE®, Timber or SoundBlok® Noise Barrier Systems.

Our ArmaGATECANTILEVER / SLIDING® system integrates seamlessly with the complete range of Gramm Barrier Systems perimeter security systems and harmonises with all styles of existing or new boundary installations, with an extensive choice of widths and heights and an almost endless array of infills.

The ArmaGATECANTILEVER / SLIDING® system is clad with various Gramm fencing and noise barrier products that are fixed to a steel SHS surround.

The ArmaGATECANTILEVER / SLIDING® gate not only offers great security, but they present a modern and professional entry and exit control. You can choose from manual or automatic operation, and with double gate drive through widths of up to 20000mm, they allow access room for even the largest of vehicles. The track of the sliding gate is totally enclosed too, preventing damage from vandals.

Not only are they incredible cost effective, but ArmaGATECANTILEVER / SLIDING® gates also conform to the British Safety Standards (BS EN 12453) for power-operated industrial or commercial gates, so you have they added assurance that they're built with quality in mind.

All of Gramm Barriers ArmaGATE® systems are manufactured to meet the relevant British Standard rating, providing excellent quality assurances and is covered by our 15 year guarantee.
