Ideal for places like detention centres, ArmaMeshSCREEN is created by fitting the durable polyethylene (PE) screens to any of the double welded wire fences from our ArmaMeshTWIN range. Screens are secured in place using custom made clip fixings and sturdy bolts, ensuring they'll stand up to vandals.

Polyethylene is both UV stable and weatherproof, so screens will keep their colour even in varying temperatures. It's a cost-effective material that looks great too, making your fencing system fit in perfectly with any surrounding environment.

And like all of the fences in our ArmaMeshTWIN range, ArmaMeshSCREEN conforms to the British Safety Standards for open mesh steel panel fences, offering added peace of mind.

East Sussex South East Wales & West West Yorkshire Scotland
