

ArmaMeshSPORTREBOUND

MESH FENCING

Gramm Barrier Systems Mesh Range

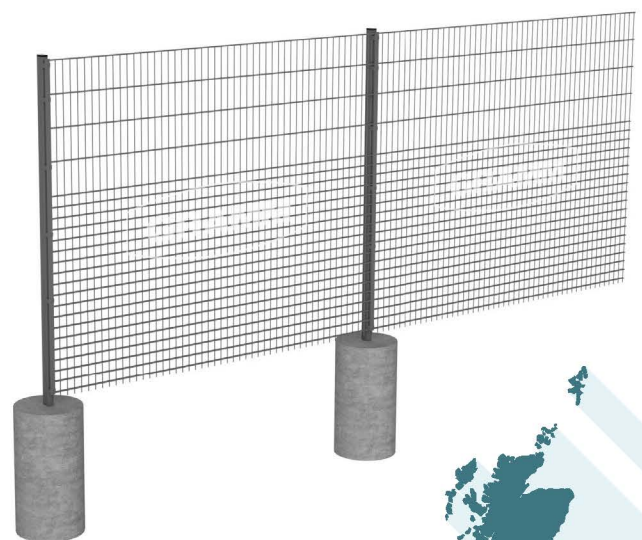

As the tennis court fencing system that is designed to stand up everything that's thrown or kicked onto it, ArmaMeshSPORTREBOUND features highly dense double steel wire mesh panels that will absorb the shock of even smaller balls and return them to play without interruption.

This means you can say goodbye to traditional plywood, timber or mesh rebound boards around your school, sports grounds or MUGA (multi-purpose game area), and instead opt for a fencing system that's hard to cut through, practical and designed for tennis court fencing projects.

Technical specifications

Height	2.0m Full Rebound/3.0m with Rebound to 1.2m as combination panel (other heights and combinations are available using ArmaMeshSPORT or ArmaMeshSPORTREBOUND) Panels as a double lift, please contact Gramm Barrier Systems for further details

Maximum Posts Centres	2520mm
Bottom of Fencing to Be	Approx. 50 mm above final ground level
Other Requirements	PPC Colour Green RAL 6005. A full range of RAL Colours are available from Gramm Barrier Systems including marine grade and metallics

You can choose ArmaMeshSPORTREBOUND panels – with horizontal wires 66.5mm apart and 50mm vertical – around your entire perimeter. You can also combine with our ArmaMeshSPORT panels – with 200mm spaces between horizontal wires – to create a fence with a smaller aperture towards the bottom, and with more visibility higher up. Either way, you'll be investing in a high quality sporting perimeter that's built to last.
