Gramm Barrier Systems SoundBlok Range

CLEARSoundBlok® ABSORPTIVE CE

Transparent noise barriers make an effective yet aesthetic contribution towards reducing sound emission.

The CLEARSoundBlok ABSORPTIVE barrier considerably reduces the noise level in the area behind the wall. This unique barrier design offers all the benefits of a clear system whilst also offering an absorptive surface which is critical in certain locations.

In short, CLEARSoundBlok® with its transparency, light weight and formability, fits harmoniously into our environment.

The Advantages of CLEARSoundBlok ABSORPTIVE Noise Barriers

Absorptive system

The unique design offers a transparent absorptive noise barrier system.

Freedom of Design

The simple and inexpensive mode of fabrication offered by the sheets, such as thermoforming, cutting to size and drilling or surfacetreatment, gives you practically unlimited creative scope.

Safety

Transparent noise barriers help to increase road safety. The light-transmitting sheets cast no harsh shadows onto the roadway. Drivers stay in touch with the environment and have a clear view of their surroundings. Noise barriers made of CLEARSoundBlok® prove this day in, day out.

Optical Variety

CLEARSoundBlok® is offered in seven standard colours. Special colours can be provided on request.

Graffiti

Spray paints can be removed from CLEARSoundBlok®. We recommend softening the graffiti with a water-soluble paint thinner and then washing it off with plenty of water.

Applications

Road

Rail

Airport

Commercial

Industrial

Utilities

Ports

Defence

Residential

Housing
